

## **I live for the world peace**

Do you ever think that women are the ones who give birth to human beings and preserve the human species? On the basis of this important natural gift, mission and the role that we have in our human race, this should not be exploited or used in the shaping of our society and the world, but should be respected and honored.

The cruel reality is that women around the world give birth to human beings that existing socio-political systems exploited for personal interest of politics. The most frightening thing to me is that throughout the history of mankind politics, in the name of greed and own interests, persuade our children to bear arms and to go to war, while commanders and politicians hide their children and families in a safe place. **No mother gives birth and nurtures so that her children would kill or be killed.**

**This raises the question, "Would women even want to have babies in this world?"**

Since the beginning of humanity men were the ones who were leaders, went to wars and so it is today. Despite the fact that only women have the ability to conceive and give birth to a human being, they never, except few exceptions, rose to the throne to lead a country - the world. Mother's love for her child is a basic pattern and model for any human relationships. Both men and women should realize that women are mothers who carry, give birth and raise a child, and that child development is a fundamental concern. It is, as we know, the most important form of bonding between humans. Research has shown that the fate of whole humanity is dependent on how seriously we take this bonding, this cooperation and also the way we approach it and perform it. And this can only be done through unconditional love and respect towards both women and man.

The genius of women is the genius of humanity, but humanity is the highest form of intelligence. A woman knows what true love is, what the cooperation between people is and if she would renounced her mission, this would mean lost hope for the future of humanity. Women have the greatest gift of creativity and insight with which can greatly contribute to education of men. Men simply can not and should not hold a half of the humanity in subordination and then hope that they will avoid the devastation that was caused to them.

Would you like to end all wars? There must be a diplomatic solution for national and international disputes. Many believe that wars would be over if world

leaders would work together. For centuries, diplomats are confirming state contracts, forming resolutions and have conferences, but not a lot of issues were resolved. When will there futile fights, these destructive wars stop? It is time for the world peace based on respect and rights of every human being. Peace is not a dream, it is not a utopia, and peace is possible. Whoever wants peace should not permit attack and crimes against life.

So please suggest on behalf of the people, particularly women, mothers who give birth to human beings in the world, to launch the process of eliminating weapons and wars on the planet. Together with peaceful countries and humanitarian organizations (UNICEF, Caritas, the Red Cross, etc.), the organization of the United Nations, NATO, the Security Council, along with the Nobel Peace Prize, the Pope, religious communities, ombudsmen, along with countries that have already abolished the army (Andorra, Cook Islands, Dominica, Grenada, Haiti, Kiribati, Costa Rica, Liechtenstein, the Marshall, Islands, Maldives, Mauritius, Micronesia, Nauru, Palau, Saint Lucia, Saint Kitts and Nevis, Saint Vincent and the Grenadines, Samoa, San Marino, Solomon Islands, Tuvalu, Vanuatu, Vatican City and conditional Iceland, Monaco and Panama) and together with all the peaceful people of this planet that have enough of weapons, we want to destroy weapons and finally establish world peace, which is common to all. We have the right not to choose wars.

Weapons kill and we do not want to kill or to be killed, so we do not want and do not need weapons. Weapons are contrary to life of friendship, participation, development, creativity and love. Weapons are unnecessary and unacceptable. The existence of weapons is humiliating for women who do not give birth so that their children would be killed or would kill other people. All women give birth to children for life and not for death. And nobody has the right to impose arms to anyone and present weapons as something acceptable. We need to explain to anyone who does this that this is wrong. **How many countries do not have food, but they have weapons? We cannot eat weapons.**

What is happening to the civilization that we urge mankind to kill each other? Where are all of the humanity, intelligence, science, logic, conscience, ethics and morality? A mother carried her child under her heart for nine months, experienced difficult births and raised her child, so that this child would die in senseless wars. Why this does not end? Why all this? How is it possible that women are exploited as machines for bearing children - victims? Who dares?

Why we do not appreciate and do not respect human life? Why do not we respect women-mothers who give birth and raise human beings? Human life is the greatest miracle of this universe, and we must respect it. Material things are of secondary importance, because they are quickly fleeting.

Why is humanity killing in wars and elsewhere?

Why mankind produces weapons, if it kills and is dangerous and expensive, if it is inhumane, and if it is illegal to carry a weapon? Why mankind manufactures and sells weapons if it is completely pointless, unnecessary, unacceptable and absurd? Who is the one who does not want to establish peace in the world, which is necessary for mutual harmony, friendship and also the quality of life of all people? Apparently it is more than enough. Are the earnings from weapons industry more important than human life?

How do people allow to produce weapons, hold and operate them, if they are aware that weapons kill – a man, a woman, a child, a mother, a pregnant woman, a father, a brother, a sister, a grandmother, a grandfather, a relative, a friend, a neighbor, a disabled person, someone you know, strangers, animals, innocent victims? How do adults explain to a small child that weapons are for killing, why there are wars, why police officer have guns, why soldiers wear a machine gun, a semi-automatic rifle, why they drive a tank or a fighter plane, what is the a nuclear bomb? How can a healthy mind interpret and understand so many wars and millions of innocent people dead, so much grief, war invalids without arms and legs, so many tears, sadness and pain, so many broken homes, buildings, so many murders and suicides by firearms, such a pointless doing? When talking about innocent, I also remember manipulated soldiers who are blinded by the fact that killing is justifiable, while politicians remain with their families and live far away from the war. Every moment I wonder who and what is the man who can persuade another person to take weapons into his/her hands and kills.

How are humans - humanity - the policy not ashamed to have weapons? How do you men (humanity, policy) even dare to think of weapons and killing?

It is just not normal, not a common sense, it is not acceptable, it is not justifiable, it is just sick. **So very sick that humanity desperately needs awakening and healing. And it needs peace! This was also noted by Alfred Nobel.** We must act now, although we missed a lot and we have to live with this. We are saying that we did not do anything, but we observed daily killing and we still do. And while there is someone who sings, dances, laughs, some are even happy, but at the same time in our vicinity and on the other end of the world our fellow human beings are cruelly dying. How vile and inhuman! So illogical of all human rights laws that were written by men who do not apply them and infringe them all the time.

So many people died as a result of weapons and are still dying every day in order to have the whole world mourn on a daily basis, because there is nothing we can do. I used to think that foreign language skills contribute to the communication of nations and their political leaders. It is difficult to see staged, ironic, and cynical statesmen meeting and smiling to the camera, while at the same time their citizens are suffering from a thousand reasons. All the heads of the states and governments are smiling and sending soldiers to kill people, but they are the ones that are responsible.

You never know when a person who owns a weapon would kill a completely unknown person in the world, in any country. If weapons are permitted, are we then allowed to kill? The politics creates hate between nations. This happened in the First and the Second World War, this happened in wars in the Balkans, Iraq, Vietnam, Syria, Ukraine, to name just a few.

Didn't they teach us anything? The politics could also be eliminated. How is it possible with all the knowledge of many foreign languages and other skills that throughout history politicians have failed to achieve peace? Two deaf and dumb men immediately agree, while educated people, two Heads of State are unable to do so.

I would like to ask Heads of State, Ministers, Members of Parliament and Members of the Ombudsman, the judiciary, army, police, prison officers and anyone else on this planet: **Have you ever thought of a world without weapons, the world peace, and what have you done for this so far?** Or do you think that the existence of weapons and wars is normal and that all is well and good or that nothing can be done? Have you ever thought to go to war yourself? Would you even considered a weapon and "killing makes sense"? Do they want to continue to have such a world for themselves, their families and friends, for the whole world? I'm sorry and at the same time I am ashamed that I am a member of such a society, the civilization. Humanity is far from civilization, far from the humane society.

A person with a weapon is dangerous to oneself and to others. People do not feel any more secure because of weapons, because it is not safe. Weapons should be put in a pile and destroyed. Competent authorities should find weapons on the black market and in homes of individuals, and weapon factories should be closed. People who used weapons before can be renamed to "guardians of the peace" and perform work in humanitarian organizations and assist police officers who could also be renamed to "guardians of the peace" or to e.g. peacekeepers, security goursds peace organizers, social workers, etc.

If you are afraid of extraterrestrial civilizations, it is necessary to discuss, what to do in case of encountering them. Those people, who claim to have already

seen them, emphasize that they are extremely well-intentioned and that we just want to make progress to their level of development. However, if official politics does not recognize the existence of other civilizations, it does not even need a weapon against them.

The abolition of the monetary system must also take place in parallel with the destruction of weapons. Monetary system benefits only to those who are in power, bankers and cunning individuals. All people should have free access to goods that they need for life. The most important task of our generation and civilization is to eliminate the weaponry and the monetary system. Only then can we become a modern and civilized society. Life as we know it now will go to the dustbin of history. Or do you have a better suggestion for us and our children?

**What will you do when you read all this? Don't you feel this obligation to take action? Now!**

The need to eliminate all weapons and war on this planet! Then we could start talk about peace and the quality of life on this planet, which is the only one for all of us. That is the solution, how to emerge from the global crisis. Everything else is wandering in the fog and prolonging the agony. We have to abolish the weaponry and the monetary system. This was also proposed by Pope Francis.

**What can we do?**

Simple, let's create a new and a better world for all people. To eliminate the cause of the state in which the humankind is. In the first place - the weaponry system, which is together with the monetary system one of the biggest fraud of human race. Associations and civil societies around the world should resist the weaponry system and demand the destruction of all weapon factories, lawful weapons and weapons on the black market, abolish all armies (28 countries have already done that) and to educate children and adults in the spirit of a world without weapons. We have the right to do this for our children. Too me, this seems to be the duty and the mission of women and mothers. For example, "We do not want the world of weapons and wars! We do not want our children to kill and we do not want our children to be killed! We all have the right to world peace!"

- Second, women give birth to human beings and as human beings we have the duty and the right to demand that our children live in a world of prosperity; this means that no one should live in poverty and all should have a safe and healthy life. Poverty is inadmissible. "

- Third, we must recognize that violence in our society originates from the lack

of resources, the lack of love, respect, wrong patterns of education, disparity, greed, alcohol, drugs, inappropriate television content, the Internet, the existence of weapons, etc. "Women and mothers have the right to demand the world without any violence for their children, they deserve respect. "

- Fourth, we must abandon the existing monetary system, which is the biggest cause of all problems of mankind. Money creates differences, poverty, violence, and war. Economies must base on natural resources and raw materials and not on worthless paper.

- And fifth, we must establish an entirely new social and political system that will create prosperity, peace, creativity, mutual harmony, friendship, health, respect, love.

**If women (mothers) do not implement changes, no one will do this for us. Only a mother's love is so powerful that it can change the world.**

I am also writing to you because of maternal love for my baby, and I know all women (mothers) feel the same way. Women, even if they are not mothers, they possess the maternal instincts and love. And the biggest problem of humanity is the lack of love. Love brings tolerance and tolerance brings peace.

**Around the world, I suggest a petition or command for the destruction of weapons and for world peace.**

**YOU CAN DO IT! THANK YOU!**

All good for all of us! Let peace be with us!
